

Symbios Women's Health

Program Name Options, Positioning, and Core Messaging DRAFT

Program Name Options

These name candidates are grounded in the Symbios naming system, the brand archetypes, and the program's clinical and emotional purpose. Each follows the existing Symbios prefix convention and is designed to feel at home alongside SymbiosAlign, SymbiosFit, and SymbiosCare.

NAMING CRITERIA

Each name was evaluated against four criteria: fit with the Symbios naming system, alignment with the Caregiver and Magician archetypes, ease of verbal referral by staff, and clarity of meaning for patients.

Name	Rationale	Best Fit For
SymbiosHer	Direct, warm, and immediately clear. Follows the Symbios prefix pattern exactly. Staff can refer to it in one word. 'Your care team includes SymbiosHer.' Clean verbal and written presence.	Primary referral language and internal program identity.
Symbios Women's Health	The current working name. Clear, searchable, and trusted. Lacks the brand energy of the other options but performs well in SEO and for patients who are less familiar with the Symbios ecosystem. Best as a subtitle or descriptive layer.	Website headers, SEO, and insurance or referral contexts where clarity outweighs brand differentiation.
SymbiosGrace	Grace carries the Caregiver archetype naturally. It suggests ease, dignity, and care without effort. Resonates with the Lowcountry patient demographic and the program's tone of supported, unhurried care.	Patient experience materials and membership communications.

Recommendation

Lead with SymbiosHer as the primary program name for internal referrals and patient-facing materials. Use Symbios Women's Health as the descriptive subtitle in search, website headers, and formal materials where clarity is the priority.

Example: SymbiosHer | Symbios Women's Health Program

Positioning Statement

Positioning Direction

Physician-Led, Whole-Woman Health Care

One connected team. One personal plan. Complete care for every stage of her health.

Full Positioning Statement

For women in the Lowcountry who are navigating hormonal changes, brain fog, metabolic shifts, or the frustration of feeling like their health has no clear plan, SymbiosHer is a physician-led women's health program that brings medical care, hormone support, nutrition, fitness, and health coaching together in one coordinated team.

Unlike OB-GYN or primary care visits that address one issue at a time, a functional medicine practice focused on supplements and lifestyle, or a wellness provider without physician oversight, SymbiosHer gives you a connected team — your physician, nurse practitioner, and women's health coach — working from the same plan, documented in the same chart, with the same shared goal: to help you understand your body, feel clear and capable, and build the health you want.

Competitive Alternatives

What they offer OB-GYN or primary care Functional medicine Hormone clinics Wellness coaches alone	What's missing Visit-by-visit care. No connected plan between appointments. Often outside insurance. No physician-led accountability or shared chart. Hormone management only. No nutrition, fitness, or coach support. No physician oversights. Recommendations without medical grounding.
---	---

Unique Attributes

SymbiosHer is the only women's health program in the Lowcountry that combines physician oversight, nurse practitioner care, and a dedicated women's health coach in one connected team, documented in one shared chart, with every team member contributing to the same patient plan.

The physician reviews and approves all patient education content published in the Women's Health Repository. The women's health coach follows up directly with each patient, extending the care relationship between clinical visits. Every interaction is documented for the full team to see and support.

Short Positioning Statements

ONE SENTENCE

SymbiosHer is a physician-led women's health program that brings hormonal care, nutrition, fitness, and coaching together in one connected team at Symbios.

STAFF REFERRAL LANGUAGE

Our women's health program, SymbiosHer, gives you a physician, a nurse practitioner, and a dedicated women's health coach working together from the same plan.

TAGLINE OPTIONS

Complete care for every stage of her health.

One team. One plan. Complete women's care.

Care that connects everything.

Core Messaging Framework [Draft]

Structured using the StoryBrand framework: character, problem, guide, plan, call to action, success, and failure. Modeled on the SymbiosAlign messaging structure.

The Character

She is a SymbiosCare member or primary care patient between 40 and 65. She is educated, health-conscious, and actively managing her life. She notices that something has shifted. Her thinking is slower. Her energy does not match her effort. She feels less like herself.

She may have mentioned brain fog to her doctor and been told her labs look normal. She may have tried supplements or changed her diet without consistent results. She is not looking for a quick fix. She wants to understand what is happening in her body and find a team she can trust to help her address it.

What She Wants

What she says she wants	What she really wants
To feel clear and sharp again	To feel like herself. Confident, capable, and in control.
To understand why her body is changing	To stop guessing and start trusting a team that listens.
To have a plan that connects everything	To know that her health is being looked at as a whole, not in pieces.
To feel supported, not managed	To belong to a care team that knows her and stays with her.

The Problem

EXTERNAL PROBLEM

She is experiencing brain fog, fatigue, hormonal symptoms, or changes in body composition that feel unexplained. Her current care addresses one issue at a time. No one has looked at how her hormones, nutrition, movement, and mental clarity connect.

INTERNAL PROBLEM

She is frustrated and quietly worried. She works hard, makes good decisions, and still feels like her body is not cooperating. She wonders if this is just age, or if something is actually wrong that no one has taken seriously.

PHILOSOPHICAL PROBLEM

She deserves care that sees her as a whole person. A plan that connects her hormonal health, metabolic health, brain health, and physical health is not a luxury. It is what complete care looks like.

The Guide

The SymbiosHer team is the guide. The physician brings medical oversight and approves every piece of patient education. The nurse practitioner brings clinical expertise and a personal relationship. The women's health coach brings extended support, follow-through, and a trusted connection between visits.

Together, they do not just treat symptoms. They help each patient understand what her body needs and build a plan that addresses it.

"Debbie, Mystica, and Shelly collaborate to discuss and research this topic. Shelly becomes a trusted and accessible contact for the patient through SymbiosCare membership, documenting her meeting summary in the chart for Mystica and Debbie for all to see and support." — Dr. Luther

The Plan

STEP 1 — CLINICAL EVALUATION

The patient meets with the nurse practitioner or physician. Brain fog, hormonal symptoms, metabolic health, and nutrition are reviewed. Education begins in the room, and appropriate care is prescribed, including hormone therapy when indicated.

STEP 2 — REFERRAL TO THE WOMEN'S HEALTH COACH

The clinician refers the patient to the women's health coach. Before their meeting, the patient receives curated links from the Women's Health Repository so she arrives informed and ready to go deeper.

STEP 3 — COACHING SESSION AND PERSONAL CONNECTION

The women's health coach meets personally with the patient. She expands on clinical education, answers questions, and helps the patient understand how hormones, nutrition, and daily habits affect her brain and body. This session is documented in the shared chart.

STEP 4 — ONGOING CARE AS A SYMBIOSCARE MEMBER

The patient's women's health goals become a dedicated focus within her SymbiosCare membership. Nutritional education and a dedicated fitness routine are added to the plan. The full team can see, support, and adjust as her health progresses.

Call to Action

DIRECT CTA

Talk to your care team about SymbiosHer at your next visit.

TRANSITIONAL CTA

Visit the Women's Health Repository to read more about hormonal health, brain clarity, and what your body needs at every stage.

Success

She feels clear, energized, and like herself again. She understands the connection between her hormonal health, her nutrition, and how her brain works. She has a team she trusts, a plan that is hers, and ongoing support that stays with her through every stage of her health.

Failure (the cost of not acting)

She continues to manage her health in pieces, never getting a full picture. Brain fog persists. Hormonal changes go unaddressed or are treated in isolation. She settles for 'normal labs' as the answer and stops expecting more. The connection between her body, her mind, and her health never gets made.

Core One-Liner

Many women navigating hormonal changes, brain fog, and shifting energy are told their labs look fine and handed no plan. SymbiosHer gives you a physician-led team — your doctor, nurse practitioner, and women's health coach — working together from one shared plan to help you understand your body, restore clarity, and build the health you want for the rest of your life.

Voice-of-Customer Proof Points

The following patient language should inform how staff, coaches, and content writers describe this program. When patients use these words, meet them there.

What patients say about the problem <i>"I feel like I'm in a fog."</i> <i>"My doctor says everything looks normal, but I don't feel normal."</i> <i>"I can't remember things the way I used to."</i> <i>"I don't know if this is hormones or something else."</i>	What patients say about Symbios <i>"I have a plan now. This is the first time everything connects."</i> <i>"There was an instant comfort here that is unusual and special."</i> <i>"Working with Debbie has just been such an enjoyable experience."</i> <i>"Your health is dynamic. It's not static at all."</i>
